### Research Interests

- Phenomenology and Existentialism
- Western Philosophy
- Philosophy of Technology
- Continental Philosophy

### Brief Summary of Research

Anoop has published 8 research papers in National and International Journals, presented papers in 13 national and international conferences. Currently he is supervising one PhD student.

### An overview of Research on Philosophy of Technology:

Philosophy of technology is an emerging subfield in philosophy, dealing with the nature of technology, the basis of technological knowledge, and the way technology transforms humanity and society. Modern technological transformations are studied both in terms of their emancipatory potential and danger. With the emergence and establishment of the technological society all over the world, philosophical research in technology has been enormous and rigorous. The debate has been critical, diverse, inconclusive, open and at the same time enlightening.
